SUBJECT INDEX

Aerodynamic forces
Prediction of Aeroelastic Vibration of Rectangular Cylinders by k-ε Model, K. Shimada and T. Ishihara, AS Oct. 99, p122-135.

Aeroelasticity
Unstable Oscillations of Rectangular Cylinder at Various Mass Ratios, Tetsuro Tamura and Yoshiaki Itoh, AS Oct. 99, p136-144.

Aerospace engineering
Editorial. Special Issue on Robotics, Irving J. Oppenheim, AS Apr. 99, p33.

Atmospheric boundary layers
Experimental, Numerical, and Analytical Models for Dispersion Study, Horia Hangan, AS Oct. 99, p161-167.

Simulations of Flow and Dispersion around Buildings, Ian P. Castro, Ian R. Cowan and Alan G. Robins, AS Oct. 99, p145-162.

Automation
NIST Research Toward Construction Site Integration and Automation, W. Stone, K. Reed, P. Chang, L. Pfeffer and A. Jacoff, AS Apr. 99, p50-57.

Path Planning and Control for Free-Flying Inspection Robot in Space, Howie Choset and David Kortenkamp, AS Apr. 99, p74-81.

Survey of Construction Metrology Options for AEC Industry, C. Lindfors, P. Chang and W. Stone, AS Apr. 99, p58-64.

Axial compression
Imperfection Sensitivity of Moderately Thick Laminated Cylindrical Shells, G. J. Simitses and S. S. Hsiung, AS Jan. 99, p8-12.

Buckling
Buckling of Thin-Walled Eccentric Compressive Members Considering Shear Lag, Quanfeng Wang and W. Y. Li, AS July 99, p105-109.

Design and Fabrication of CFRP Interstage Attach Fitting for Launch Vehicles, An Hou and Kurt Gramoll, AS July 99, p83-91.

Imperfection Sensitivity of Moderately Thick Laminated Cylindrical Shells, G. J. Simitses and S. S. Hsiung, AS Jan. 99, p8-12.

Buildings
Simulations of Flow and Dispersion around Buildings, Ian P. Castro, Ian R. Cowan and Alan G. Robins, AS Oct. 99, p145-162.

Cameras
Path Planning and Control for Free-Flying Inspection Robot in Space, Howie Choset and David Kortenkamp, AS Apr. 99, p74-81.

Carbon
Design and Fabrication of CFRP Interstage Attach Fitting for Launch Vehicles, An Hou and Kurt Gramoll, AS July 99, p83-91.

Civil engineering
Computational Wind Engineering: Is It Mature for Civil Engineering Applications, Ted Stathopoulos, AS Oct. 99, p111-112.

Composite materials
PVDF Film Sensor and Its Applications in Damage Detection, H. Luo and S. Hanagud, AS Jan. 99, p23-30.

Composite structures
Analysis of Composite Panels Subjected to Thermo-Mechanical Loads, Ahmed K. Noor and Jeanne M. Peters, AS Jan. 99, p1-7.

Design and Fabrication of CFRP Interstage Attach Fitting for Launch Vehicles, An Hou and Kurt Gramoll, AS July 99, p83-91.

Compressive strength
Design and Fabrication of CFRP Interstage Attach Fitting for Launch Vehicles, An Hou and Kurt Gramoll, AS July 99, p83-91.

Computation
Large Eddy Simulation of Vortex Shedding from Cubic Obstacle, T. G. Thomas and J. J. R. Williams, AS Oct. 99, p113-121.

Computer programs
Computational Wind Engineering: Is It Mature for Civil Engineering Applications, Ted Stathopoulos, AS Oct. 99, p111-112.

Construction
NIST Research Toward Construction Site Integration and Automation, W. Stone, K. Reed, P. Chang, L. Pfeffer and A. Jacoff, AS Apr. 99, p50-57.

Construction equipment
NIST Research Toward Construction Site Integration and Automation, W. Stone, K. Reed, P. Chang, L. Pfeffer and A. Jacoff, AS Apr. 99, p50-57.

Construction industry
Survey of Construction Metrology Options for AEC Industry, C. Lindfors, P. Chang and W. Stone, AS Apr. 99, p58-64.

Control
Path Planning and Control for Free-Flying Inspection Robot in Space, Howie Choset and David Kortenkamp, AS Apr. 99, p74-81.

Control systems
Second-Order Sensitivity of Smart Structures, Xiaojian Liu and David William Begg, AS Jan. 99, p15-22.

Curvature
Analysis of Composite Panels Subjected to Thermo-Mechanical Loads, Ahmed K. Noor and Jeanne M. Peters, AS Jan. 99, p1-7.

Cylinders
Prediction of Aeroelastic Vibration of Rectangular Cylinders by k-ε Model, K. Shimada and T. Ishihara, AS Oct. 99, p122-135.

Unstable Oscillations of Rectangular Cylinder at Various Mass Ratios, Tetsuro Tamura and Yoshiaki Itoh, AS Oct. 99, p136-144.

Cylindrical shells
Alleviation of Deformation of Cylindrical Shell Using Piezoelectric Rings, Ji Y. Shen, Meldon Human, Lonnie Sharpe, Jr. and James T. S. Wang, AS July 99, p92-97.

Imperfection Sensitivity of Moderately Thick Laminated Cylindrical Shells, G. J. Simitses and S. S. Hsiung, AS Jan. 99, p8-12.

Damage
PVDF Film Sensor and Its Applications in Damage Detection, H. Luo and S. Hanagud, AS Jan. 99, p23-30.

Damage assessment
Damage Tolerance and Assessment of Foam-Inflated Aerospace Structures, John A. Main, Suzanne Weaver Smith and Alexander L. Chapman, AS July 99, p98-104.

Damping
Unstable Oscillations of Rectangular Cylinder at Various Mass Ratios, Tetsuro Tamura and Yoshiaki Itoh, AS Oct. 99, p136-144.

Deformation
Alleviation of Deformation of Cylindrical Shell Using Piezoelectric Rings, Ji Y. Shen, Meldon Human, Lonnie Sharpe, Jr. and James T. S. Wang, AS July 99, p92-97.

Delaminating
PVDF Film Sensor and Its Applications in Damage Detection, H. Luo and S. Hanagud, AS Jan. 99, p23-30.

Dispersion
Experimental, Numerical, and Analytical Models for Dispersion Study, Horia Hangan, AS Oct. 99, p161-167.

Dynamic analysis
Adaptive Refinement/Recovery for Analysis of Wind around Structure, Chang-Koon Choi and Won-Jin Yu, AS Oct. 99, p168-175.

Dynamic properties
Unstable Oscillations of Rectangular Cylinder at Various Mass Ratios, Tetsuro Tamura and Yoshiaki Itoh, AS Oct. 99, p136-144.

Dynamics
Large Eddy Simulation of Vortex Shedding from Cubic Obstacle, T. G. Thomas and J. J. R. Williams, AS Oct. 99, p113-121.

Economic analysis
Saving Lives and Money with Robotic Trenching and Pipe Installation, Junbok Lee, Steven J. Lorenc and Leonhard E. Bernold, AS Apr. 99, p43-49.

Eddy viscosity
Prediction of Aeroelastic Vibration of Rectangular Cylinders by k-ε Model, K. Shimada and T. Ishihara, AS Oct. 99, p122-135.

Elasticity
Prediction of Aeroelastic Vibration of Rectangular Cylinders by k-ε Model, K. Shimada and T. Ishihara, AS Oct. 99, p122-135.

Engineering
Computational Wind Engineering: Is It Mature for Civil Engineering Applications, Ted Stathopoulos, AS Oct. 99, p111-112.

Excavation
Constructing Hydraulic Robot Models Using Memory-Based Learning, Murali Krishna and John Bares, AS Apr. 99, p34-42.

Saving Lives and Money with Robotic Trenching and Pipe Installation, Junbok Lee, Steven J. Lorenc and Leonhard E. Bernold, AS Apr. 99, p43-49.

Failure load
Design and Fabrication of CFRP Interstage Attach Fitting for Launch Vehicles, An Hou and Kurt Gramoll, AS July 99, p83-91.

Fiber reinforced plastics
Design and Fabrication of CFRP Interstage Attach Fitting for Launch Vehicles, An Hou and Kurt Gramoll, AS July 99, p83-91.

Filament wound materials
Design and Fabrication of CFRP Interstage Attach Fitting for Launch Vehicles, An Hou and Kurt Gramoll, AS July 99, p83-91.

Finite element method
Adaptive Refinement/Recovery for Analysis of Wind around Structure, Chang-Koon Choi and Won-Jin Yu, AS Oct. 99, p168-175.

Flexibility
A Follow-the-Leader Approach to Serpentine Robot Motion Planning, Howie Choset and Wade Henning, AS Apr. 99, p65-73.

Fluid dynamics
Simulations of Flow and Dispersion around Buildings, Ian P. Castro, Ian R. Cowan and Alan G. Robins, AS Oct. 99, p145-162.

Fluid flow
Unstable Oscillations of Rectangular Cylinder at Various Mass Ratios, Tetsuro Tamura and Yoshiaki Itoh, AS Oct. 99, p136-144.

Foam
Damage Tolerance and Assessment of Foam-Inflated Aerospace Structures, John A. Main, Suzanne Weaver Smith and Alexander L. Chapman, AS July 99, p98-104.

Hydraulic models
Constructing Hydraulic Robot Models Using Memory-Based Learning, Murali Krishna and John Bares, AS Apr. 99, p34-42.

Imperfections
Imperfection Sensitivity of Moderately Thick Laminated Cylindrical Shells, G. J. Simitses and S. S. Hsiung, AS Jan. 99, p8-12.

Inflatable structures
Damage Tolerance and Assessment of Foam-Inflated Aerospace Structures, John A. Main, Suzanne Weaver Smith and Alexander L. Chapman, AS July 99, p98-104.

Innovation
Editorial. Special Issue on Robotics, Irving J. Oppenheim, AS Apr. 99, p33.

Inspection
Path Planning and Control for Free-Flying Inspection Robot in Space, Howie Choset and David Kortenkamp, AS Apr. 99, p74-81.

Intelligent structures
Second-Order Sensitivity of Smart Structures, Xiaojian Liu and David William Begg, AS Jan. 99, p15-22.

Lateral pressure
Imperfection Sensitivity of Moderately Thick Laminated Cylindrical Shells, G. J. Simitses and S. S. Hsiung, AS Jan. 99, p8-12.

Lattice design
Design and Fabrication of CFRP Interstage Attach Fitting for Launch Vehicles, An Hou and Kurt Gramoll, AS July 99, p83-91.

Learning systems
Constructing Hydraulic Robot Models Using Memory-Based Learning, Murali Krishna and John Bares, AS Apr. 99, p34-42.

Load combinations
Analysis of Composite Panels Subjected to Thermo-Mechanical Loads, Ahmed K. Noor and Jeanne M. Peters, AS Jan. 99, p1-7.

Machinery
Constructing Hydraulic Robot Models Using Memory-Based Learning, Murali Krishna and John Bares, AS Apr. 99, p34-42.

Mass
Unstable Oscillations of Rectangular Cylinder at Various Mass Ratios, Tetsuro Tamura and Yoshiaki Itoh, AS Oct. 99, p136-144.

Materials, properties
Damage Tolerance and Assessment of Foam-Inflated Aerospace Structures, John A. Main, Suzanne Weaver Smith and Alexander L. Chapman, AS July 99, p98-104.

Measurement
Survey of Construction Metrology Options for AEC Industry, C. Lindfors, P. Chang and W. Stone, AS Apr. 99, p58-64.

Measuring instruments
Survey of Construction Metrology Options for AEC Industry, C. Lindfors, P. Chang and W. Stone, AS Apr. 99, p58-64.

Mesh generation
Adaptive Refinement/Recovery for Analysis of Wind around Structure, Chang-Koon Choi and Won-Jin Yu, AS Oct. 99, p168-175.

Modeling
Prediction of Aeroelastic Vibration of Rectangular Cylinders by k-ε Model, K. Shimada and T. Ishihara, AS Oct. 99, p122-135.

Monitoring
PVDF Film Sensor and Its Applications in Damage Detection, H. Luo and S. Hanagud, AS Jan. 99, p23-30.

Motion
Constructing Hydraulic Robot Models Using Memory-Based Learning, Murali Krishna and John Bares, AS Apr. 99, p34-42.

A Follow-the-Leader Approach to Serpentine Robot Motion Planning, Howie Choset and Wade Henning, AS Apr. 99, p65-73.

Nonlinear analysis
Analysis of Composite Panels Subjected to Thermo-Mechanical Loads, Ahmed K. Noor and Jeanne M. Peters, AS Jan. 99, p1-7.

Nonuniformity
Experimental, Numerical, and Analytical Models for Dispersion Study, Horia Hangan, AS Oct. 99, p161-167.

Numerical models
Experimental, Numerical, and Analytical Models for Dispersion Study, Horia Hangan, AS Oct. 99, p161-167.

Simulations of Flow and Dispersion around Buildings, Ian P. Castro, Ian R. Cowan and Alan G. Robins, AS Oct. 99, p145-162.

Optimal control methods
Second-Order Sensitivity of Smart Structures, Xiaojian Liu and David William Begg, AS Jan. 99, p15-22.

Optimization
Adaptive Refinement/Recovery for Analysis of Wind around Structure, Chang-Koon Choi and Won-Jin Yu, AS Oct. 99, p168-175.

Constructing Hydraulic Robot Models Using Memory-Based Learning, Murali Krishna and John Bares, AS Apr. 99, p34-42.

Oscillations
Unstable Oscillations of Rectangular Cylinder at Various Mass Ratios, Tetsuro Tamura and Yoshiaki Itoh, AS Oct. 99, p136-144.

Panels
Analysis of Composite Panels Subjected to Thermo-Mechanical Loads, Ahmed K. Noor and Jeanne M. Peters, AS Jan. 99, p1-7.

Piezoelectricity
Alleviation of Deformation of Cylindrical Shell Using Piezoelectric Rings, Ji Y. Shen, Meldon Human, Lonnie Sharpe, Jr. and James T. S. Wang, AS July 99, p92-97.

Pipe laying
Saving Lives and Money with Robotic Trenching and Pipe Installation, Junbok Lee, Steven J. Lorenc and Leonhard E. Bernold, AS Apr. 99, p43-49.

Quadratic programming
Second-Order Sensitivity of Smart Structures, Xiaojian Liu and David William Begg, AS Jan. 99, p15-22.

Real-time programming
NIST Research Toward Construction Site Integration and Automation, W. Stone, K. Reed, P. Chang, L. Pfeffer and A. Jacoff, AS Apr. 99, p50-57.

Rectangular cross section
Prediction of Aeroelastic Vibration of Rectangular Cylinders by k-ε Model, K. Shimada and T. Ishihara, AS Oct. 99, p122-135.

Redundancy
A Follow-the-Leader Approach to Serpentine Robot Motion Planning, Howie Choset and Wade Henning, AS Apr. 99, p65-73.

Remote control
NIST Research Toward Construction Site Integration and Automation, W. Stone, K. Reed, P. Chang, L. Pfeffer and A. Jacoff, AS Apr. 99, p50-57.

Resources
NIST Research Toward Construction Site Integration and Automation, W. Stone, K. Reed, P. Chang, L. Pfeffer and A. Jacoff, AS Apr. 99, p50-57.

Rigid-body dynamics
Damage Tolerance and Assessment of Foam-Inflated Aerospace Structures, John A. Main, Suzanne Weaver Smith and Alexander L. Chapman, AS July 99, p98-104.

Rings
Alleviation of Deformation of Cylindrical Shell Using Piezoelectric Rings, Ji Y. Shen, Meldon Human, Lonnie Sharpe, Jr. and James T. S. Wang, AS July 99, p92-97.

Robotics
Constructing Hydraulic Robot Models Using Memory-Based Learning, Murali Krishna and John Bares, AS Apr. 99, p34-42.

Editorial. Special Issue on Robotics, Irving J. Oppenheim, AS Apr. 99, p33.

A Follow-the-Leader Approach to Serpentine Robot Motion Planning, Howie Choset and Wade Henning, AS Apr. 99, p65-73.

Path Planning and Control for Free-Flying Inspection Robot in Space, Howie Choset and David Kortenkamp, AS Apr. 99, p74-81.

Saving Lives and Money with Robotic Trenching and Pipe Installation, Junbok Lee, Steven J. Lorenc and Leonhard E. Bernold, AS Apr. 99, p43-49.

Roofs
Large Eddy Simulation of Vortex Shedding from Cubic Obstacle, T. G. Thomas and J. J. R. Williams, AS Oct. 99, p113-121.

Safety factors
Saving Lives and Money with Robotic Trenching and Pipe Installation, Junbok Lee, Steven J. Lorenc and Leonhard E. Bernold, AS Apr. 99, p43-49.

Sensitivity analysis
Second-Order Sensitivity of Smart Structures, Xiaojian Liu and David William Begg, AS Jan. 99, p15-22.

Sensors
A Follow-the-Leader Approach to Serpentine Robot Motion Planning, Howie Choset and Wade Henning, AS Apr. 99, p65-73.

PVDF Film Sensor and Its Applications in Damage Detection, H. Luo and S. Hanagud, AS Jan. 99, p23-30.

Shear lag
Buckling of Thin-Walled Eccentric Compressive Members Considering Shear Lag, Quanfeng Wang and W. Y. Li, AS July 99, p105-109.

Simulation
Large Eddy Simulation of Vortex Shedding from Cubic Obstacle, T. G. Thomas and J. J. R. Williams, AS Oct. 99, p113-121.

Space shuttle orbiter
Path Planning and Control for Free-Flying Inspection Robot in Space, Howie Choset and David Kortenkamp, AS Apr. 99, p74-81.

Space structures
Damage Tolerance and Assessment of Foam-Inflated Aerospace Structures, John A. Main, Suzanne Weaver Smith and Alexander L. Chapman, AS July 99, p98-104.

Splines
Buckling of Thin-Walled Eccentric Compressive Members Considering Shear Lag, Quanfeng Wang and W. Y. Li, AS July 99, p105-109.

Stiffeners
Alleviation of Deformation of Cylindrical Shell Using Piezoelectric Rings, Ji Y. Shen, Meldon Human, Lonnie Sharpe, Jr. and James T. S. Wang, AS July 99, p92-97.

Structural members
Buckling of Thin-Walled Eccentric Compressive Members Considering Shear Lag, Quanfeng Wang and W. Y. Li, AS July 99, p105-109.

Surveys, data collection
Survey of Construction Metrology Options for AEC Industry, C. Lindfors, P. Chang and W. Stone, AS Apr. 99, p58-64.

Thin wall structures
Buckling of Thin-Walled Eccentric Compressive Members Considering Shear Lag, Quanfeng Wang and W. Y. Li, AS July 99, p105-109.

Three-dimensional models
Unstable Oscillations of Rectangular Cylinder at Various Mass Ratios, Tetsuro Tamura and Yoshiaki Itoh, AS Oct. 99, p136-144.

Tracking
NIST Research Toward Construction Site Integration and Automation, W. Stone, K. Reed, P. Chang, L. Pfeffer and A. Jacoff, AS Apr. 99, p50-57.

Trenching
Saving Lives and Money with Robotic Trenching and Pipe Installation, Junbok Lee, Steven J. Lorenc and Leonhard E. Bernold, AS Apr. 99, p43-49.

Turbulent flow
Large Eddy Simulation of Vortex Shedding from Cubic Obstacle, T. G. Thomas and J. J. R. Williams, AS Oct. 99, p113-121.

Two-dimensional analysis
Prediction of Aeroelastic Vibration of Rectangular Cylinders by k-ε Model, K. Shimada and T. Ishihara, AS Oct. 99, p122-135.

Uncertainty analysis
Simulations of Flow and Dispersion around Buildings, Ian P. Castro, Ian R. Cowan and Alan G. Robins, AS Oct. 99, p145-162.

Vibration
Prediction of Aeroelastic Vibration of Rectangular Cylinders by k-ε Model, K. Shimada and T. Ishihara, AS Oct. 99, p122-135.

Vortex shedding
Large Eddy Simulation of Vortex Shedding from Cubic Obstacle, T. G. Thomas and J. J. R. Williams, AS Oct. 99, p113-121.

Warpage
Buckling of Thin-Walled Eccentric Compressive Members Considering Shear Lag, Quanfeng Wang and W. Y. Li, AS July 99, p105-109.

Wind
Adaptive Refinement/Recovery for Analysis of Wind around Structure, Chang-Koon Choi and Won-Jin Yu, AS Oct. 99, p168-175.

Computational Wind Engineering: Is It Mature for Civil Engineering Applications, Ted Stathopoulos, AS Oct. 99, p111-112.

Large Eddy Simulation of Vortex Shedding from Cubic Obstacle, T. G. Thomas and J. J. R. Williams, AS Oct. 99, p113-121.

Wind tunnel test
Experimental, Numerical, and Analytical Models for Dispersion Study, Horia Hangan, AS Oct. 99, p161-167.
